CamiNet – the collaborative software for you

The CamiNet solution based on AbaWebTreuhand, offers the possibility to use well-defined functions and modules of Abacus online (erp software). Tailor-made your own accounting system! And using is really simple; start the online software and record the entries directly on our server.

Please see our offered modules the following page.

All you need is internet access

It's marginal which working station or system you run. All you need is an installed internet browser and a Swiss-ID. Not only data entering is possible, you also can print analysis absolutely independent of time and place on your current station.

Other software like Citrix or windows terminal server is not necessary.

Your advantage

No more local installed software and therefore no regular software updates are required. As well the data interchange is dropped. Right after your decision for CamiNet, we provide you with the required modules so you can start booking immediately.

The data can be processed and viewed at any time and from anywhere. Both, the client and accountant work in the same interface.

Cost effectiveness

Thanks to monthly costs the expenses are transparency and calculable in advance. Moreover, you have the possibility to choose the modules according your needs individually.

Our support

We like to advice you! Please contact Andreas Okle for more information by phone 041 767 25 25 or see our webpage under www.caminada.com.
